(ON MOST PRODUCTS)

We have launched a NEW concept in muck collection to make the yard and paddock clearing a more enjoyable task in a fraction of the time!

Simple to operate, the petrol engine creates a vacuum in a large container to offer a powerful suction through the 5" pick-up nozzle and flexible hose. The lightweight but rugged construction means that ladies and young teenagers can easily handle the Trafalgar Paddock Cleaners.

The towable models are towed easily by ride-on mowers, ATV/Quad bikes, compact tractors, utility vehicles and even 4x4 motor vehicles.

Powered by a quiet, economical Kawasaki petrol engine. This industrial 2-stroke engine can produce more suction than many larger 4-stroke engines.

The clean fan vacuum design means much less chance of blockage, enabling you to Poo pick ALL year round, whether the Poo is fresh, old, in a pile or scattered around, in long or short grass, wet or dry!

Other benefits are reduced maintenance and wear, also no worries of expensive repairs if you accidentally suck up a stone!

You can also suck up.....leaves, acorns, thistles, conkers, chestnuts, fallen fruit, shavings, sawdust, shredded paper and other types of bedding, litter, clean out water troughs and collect spent clays and shotgun cartridges.
